Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

I am currently an Assistant Professor in the Department of Computer Science and Artificial Intelligence at the University of the Basque Country (EHU). My academic profile is centered on Artificial Intelligence and Natural Language Processing, especially multilingual and low-resource language technology, with emphasis on Basque, Large Language Model (LLM) evaluation and alignment, semantic textual similarity, natural language inference, interpretability, and applied AI. I have obtained a favorable CNEAI six-year research evaluation for the 2015-2020 period, recognized in 2025.

My research trajectory began in the IXA research group and was consolidated through my PhD in Natural Language Processing, entitled Contributions to Language Understanding: N-gram attention and alignments for interpretable similarity and inference. The thesis obtained the qualification Excellent Cum Laude, the European Doctorate mention, and the Special Doctorate Award. During my doctoral period, I was awarded an FPU predoctoral contract and completed two research stays at the University of Edinburgh under the supervision of Mirella Lapata, directly connected to my work on neural and interpretable models for sentence similarity and inference.

My scientific contributions connect early work on semantic textual similarity, interpretable language understanding and natural language inference with my current research on LLM evaluation, reasoning and alignment. I have published peer-reviewed work in Artificial Intelligence, Natural Language Processing, language technologies, Computer Science and educational technology, including contributions in Knowledge-Based Systems, Expert Systems with Applications, IEEE, Education and Information Technologies, Information, Procesamiento del Lenguaje Natural, SemEval, CoNLL and LREC. According to the indicators reported in this CVN, my publications have received close to 4,000 citations in Google Scholar, with particularly strong impact from my contributions to multilingual Semantic Textual Similarity and SemEval evaluation campaigns. A co-authored paper presented at CoNLL 2018 received the Best Paper Award.

At present, my research is strongly aligned with the strategic development of AI/NLP for multilingual and low-resource scenarios through my membership in HiTZ: Basque Center for Language Technology and IXA taldea at UPV/EHU. I participate in competitive projects such as DeepThought, ILENIA, CLARIAH-EUS, IC4LANG and EMIE. In EMIE (Eficiencia de Modelos LLM para Industrias Estratégicas) I serve as Principal Investigator for the UPV/EHU contribution, working on efficient LLM-based solutions for strategic industrial contexts.

Alongside this main line, I maintain secondary applied AI lines in AI for education and accessibility, reinforcement learning and optimization, industrial/logistics AI, and software engineering education. These areas are applied extensions of my central expertise in Artificial Intelligence, rather than separate research identities. They have allowed me to transfer AI methods to educational technologies, project-based learning, logistics, route optimization, adaptive decision-making and inclusive educational resources.

My teaching activity is closely connected to this profile. Since 2018, I have taught undergraduate and postgraduate courses at UPV/EHU and the University of Deusto in Computer Science, Artificial Intelligence, machine learning, search heuristics, programming, software quality and Big Data. My teaching record includes 29 teaching entries totalling approximately 150 ECTS credits, together with consistently positive student evaluations. I have also supervised numerous final-year projects in AI, reinforcement learning, software development, accessibility, data science and applied computing, and I have participated in teacher training and teaching innovation activities. My teaching materials include the book *Git Bertsioak Kontrolatzeko Sistemarako Eskuliburua*, published in Basque by Udako Euskal Unibertsitatea.

I have obtained official accreditations from ANECA and UNIBASQ in the categories of Assistant Professor, Private University Professor and Associate Professor. Overall, my profile combines a consolidated research line in AI/NLP for multilingual and low-resource language technology with strong teaching activity in Computer Science and Artificial Intelligence, and with applied AI transfer to education and industry.

General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.

My scientific production is mainly situated in Artificial Intelligence and Natural Language Processing, with a focus on multilingual and low-resource language technology, Basque language technology, semantic textual similarity, natural language inference, interpretability, and the evaluation of Large Language Models. According to the indicators reported in this CVN, my work has received close to 4,000 citations in Google Scholar, with particularly strong impact from multilingual Semantic Textual Similarity and SemEval evaluation campaigns.

My publication record includes peer-reviewed work in international journals and conferences in Artificial Intelligence, Natural Language Processing and Computer Science. Relevant contributions include publications in Knowledge-Based Systems, Expert Systems with Applications, IEEE Access, Education and Information Technologies, Information, Procesamiento del Lenguaje Natural, and NLP venues such as SemEval, CoNLL and LREC. Several of these works are indexed in high-impact venues, including Q1 journals in Computer Science, Artificial Intelligence, Information Systems, Education or related areas. My record also includes first-author and corresponding-author publications, open datasets, software resources and reproducible research materials.

My research has contributed to resources and models for language understanding: interpretable semantic textual similarity, word n-gram attention models for sentence similarity and inference, phrase-level inference benchmarks, multilingual semantic evaluation, LLM evaluation hazards, causal incoherence in LLM-based natural language inference, and knowledge-base construction from corporate relations. These contributions connect my doctoral research on interpretable NLP with my current work on LLM evaluation, reasoning and alignment.

I have participated in competitive European, national, regional and university-funded research projects. My current and recent activity is especially aligned with multilingual and low-resource language technology through DeepThought, ILENIA, CLARIAH-EUS, IC4LANG and EMIE. In EMIE, I serve as Principal Investigator for the UPV/EHU contribution. I have also contributed to applied AI projects such as LOGISTAR, AI4Transport and ACROBA, framed as applications of Artificial Intelligence, reinforcement learning, optimization and adaptive decision-making in industrial and logistics contexts.

My international research profile was strengthened through two competitive FPU-funded research stays at the University of Edinburgh, under the supervision of Mirella Lapata, which supported work on neural and interpretable models for sentence similarity and inference. I have also co-organized international SemEval shared tasks on Semantic Textual Similarity in 2015, 2016 and 2017, and have served in scientific and assessment committees and as reviewer for international journals and conferences.

In terms of recognized research quality, I have obtained a favorable CNEAI six-year research evaluation for the period 2015-2020, recognized in 2025. This evaluation, together with my indexed publications, citation record, international collaborations, competitive project participation, task organization experience and current involvement

**C****V****N**

CURRÍCULUM VÍTAE NORMALIZADO

d91b3febb06d58018a61810280138849

in strategic LLM and low-resource language technology projects, supports a coherent research profile in Artificial Intelligence and Natural Language Processing.

Inigo Lopez-Gazpio

Surname(s):	Lopez-Gazpio
Name:	Inigo

Current professional situation

Employing entity: University of The Basque Country (UPV/EHU)

Type of entity: University

Department: Department of Computer Science and Artificial Intelligence, Computer Science Faculty

Professional category: Assistant Professor

Start date: 01/09/2022

Type of contract: Permanent employment contract

Dedication regime: Full time

Performed tasks: My role as an Assistant Professor is related to shaping the academic and professional futures of our students. As an Assistant Professor, my duties encompass a diverse range of responsibilities that contribute significantly to both the academic environment and the personal development of my students. At the core, my role involves designing and delivering engaging and informative lectures in Computer Science, Artificial Intelligence, and related fields. This includes preparing course materials such as syllabi, reading assignments, and exams, as well as adapting course content to reflect the most current trends and discoveries in the field. A significant part of my responsibilities is to mentor and advise students on academic and career objectives, guiding them through complex projects and research work that align with their career aspirations and academic requirements. I foster a supportive learning environment that encourages inquiry and innovation, often involving students in my own research projects to enhance their learning experience through practical application. Furthermore, I actively participate in faculty meetings, contribute to curriculum development, and engage in continuous professional development to improve my teaching methods and academic offerings. I am also involved in administrative tasks, such as reviewing and grading student work, participating in departmental reviews, and contributing to accreditation efforts to maintain high educational standards.

Previous positions and activities

	Employing entity	Professional category	Start date
1	University of Deusto (UD)	Associate Professor	01/09/2021
2	University of Deusto (UD)	Assistant Professor	01/02/2019
3	University of Deusto (UD)	Part-Time Lecturer	01/09/2018
4	University of The Basque Country (UPV/EHU)	Predoc researcher. (funded by the Ministry of Education, Culture and Sport (MINECO FPU13/00501))	27/10/2014
5	University of The Basque Country (UPV/EHU)	Predoc researcher (funded by UPV/EHU)	01/08/2014

Education

University education

1st and 2nd cycle studies and pre-Bologna degrees

University degree: Higher degree

Name of qualification: Computer Science Engineer

Degree awarding entity: University of The Basque Country (UPV/EHU)

Date of qualification: 19/07/2013

Average mark: Excellent

Prize: Special award for degree

Standardised degree: Yes

Doctorates

Doctorate programme: Official PhD Program in Natural Language Processing and analysis

Degree awarding entity: University of The Basque Country (UPV/EHU) **Type of entity:** University

Date of degree: 30/10/2018

European doctorate: Yes

Date of certificate: 30/10/2018

Thesis title: Contributions to Language Understanding: N-gram attention and alignments for interpretable similarity and inference

Thesis director: Eneko Agirre Bengoa

Obtained qualification: Excellent Cum-Laude

Recognition of quality: Yes

Special doctorate award: Yes

Date of award: 07/11/2018

Standardised degree: Yes

Other postgraduate university studies

Type of education: Masters

Postgraduate qualification: Master's Degree in Natural Language Processing and Analysis

Degree awarding entity: University of The Basque Country (UPV/EHU)

Faculty, institute or centre: Computer Science Faculty

Date of qualification: 17/09/2014

Obtained qualification: 9.46 (Special award)

Standardised degree: Yes

Specialised, lifelong, technical, professional and refresher training (other than formal academic and healthcare studies)

- 1 Training title:** Multi-Agent Reinforcement Learning
Awarding entity: Institut d'investigació en intel·ligència artificial / CSIC
End date: 19/09/2024 **Duration in hours:** 12 hours
- 2 Training title:** Seminar on Language Technologies: Deep Learning
Awarding entity: University of The Basque Country (UPV/EHU)
End date: 26/01/2021 **Duration in hours:** 120 hours
- 3 Training title:** Student training workshop for participation in evaluation agencies
Awarding entity: UNIBASQ **Type of entity:** Research evaluation agency
End date: 18/03/2018 **Duration in hours:** 5 hours
- 4 Training title:** Course of tools and information resources for PhD
Awarding entity: University of The Basque Country (UPV/EHU)
End date: 28/01/2016 **Duration in hours:** 9 hours
- 5 Training title:** English for International Conferences
Awarding entity: University of The Basque Country (UPV/EHU)
End date: 25/06/2015 **Duration in hours:** 40 hours
- 6 Training title:** NoSQL databases
Awarding entity: Udako Euskal Unibertsitatea (UEU)
End date: 25/04/2015 **Duration in hours:** 10 hours
- 7 Training title:** Experimental design workshop
Awarding entity: University of The Basque Country (UPV/EHU)
End date: 06/06/2014 **Duration in hours:** 18 hours
- 8 Training title:** 3D printing and modeling
Awarding entity: Enpresa Digitala
End date: 26/03/2014 **Duration in hours:** 8 hours
- 9 Training title:** On-line computer course for data analysis
Awarding entity: Universidad de John Hopkings
End date: 31/10/2013 **Duration in hours:** 20 hours
- 10 Training title:** Course on the organic law on the protection of personal data
Awarding entity: Enpresa Digitala
End date: 24/10/2013 **Duration in hours:** 2 hours
- 11 Training title:** Online course in history, technology and computer security
Awarding entity: Universidad de Michigan
End date: 22/08/2013 **Duration in hours:** 45 hours

- 12 Training title:** On-line machine learning course
Awarding entity: Universidad de Stanford
End date: 13/08/2013
Duration in hours: 70 hours
- 13 Training title:** Machine Learning Course
Awarding entity: Udako Euskal Unibertsitatea (UEU)
End date: 05/07/2013
Duration in hours: 12 hours
- 14 Training title:** IEB Smartphones and computer science
Awarding entity: Udako Euskal Unibertsitatea (UEU)
End date: 08/05/2013
Duration in hours: 10 hours
- 15 Training title:** Android programming
Awarding entity: Udako Euskal Unibertsitatea (UEU)
End date: 30/04/2013
Duration in hours: 10 hours
- 16 Training title:** Web design and programming
Awarding entity: A.E.G
End date: 25/07/2007
Type of entity: Technological Centre
Duration in hours: 210 hours

Attended advanced, improvement and innovative teacher training and new technology courses and seminars focused on improving teaching

- 1 Title of course/seminar:** Innovative teacher training plan
Organising entity: University of Deusto (UD)
Duration in hours: 200 hours
Start-End date: 17/06/2019 - 26/06/2020
- 2 Title of course/seminar:** First aid in a teaching environment
Organising entity: Ministry of Spain
Duration in hours: 5 hours
Start-End date: 18/11/2019 - 25/11/2019
- 3 Title of course/seminar:** Advanced qualification book in Moodle training
Organising entity: University of Deusto (UD)
Duration in hours: 1 hour
Start-End date: 01/10/2019 - 01/10/2019
- 4 Title of course/seminar:** Moodle training
Organising entity: University of Deusto (UD)
Duration in hours: 1 hour
Start-End date: 25/09/2019 - 25/09/2019
- 5 Title of course/seminar:** Design principles of lecturing programme guides
Organising entity: University of Deusto (UD)
Duration in hours: 2 hours
Start-End date: 06/06/2019 - 06/06/2019

- 6 Title of course/seminar:** Advanced Moodle training
Organising entity: University of Deusto (UD)
Duration in hours: 4 hours
Start-End date: 18/01/2019 - 18/01/2019
- 7 Title of course/seminar:** Library know-how. How to search scientific resources
Organising entity: University of Deusto (UD)
Duration in hours: 1 hour
Start-End date: 31/10/2018 - 31/10/2018
- 8 Title of course/seminar:** IV Conference on strategies for the innovation of teaching activity in Analytical Chemistry
City organizing entity: Alcalá de Henares, Madrid, Comunidad de, Spain
Organising entity: Sociedad Española de Química Analítica (SECA)
Duration in hours: 11 hours
Start-End date: 05/07/2018 - 06/07/2018
- 9 Title of course/seminar:** Life-Long Education Course "Intensive Training in Presentations"
Organising entity: University of The Basque Country (UPV/EHU)
Duration in hours: 20 hours
Start-End date: 22/06/2015 - 25/06/2015

Mark obtained: 4.3

Top mark possible: 5

Experience supervising doctoral thesis and/or final year projects

- 1 Project title:** Desarrollo y Evaluación de Entorno de Aprendizaje por Refuerzo de Cuadricópteros Autónomos en el Simulador Lift-off
Entity: University of the Basque Country (UPV/EHU)
Student: Sergio Hernandez
Date of reading: 01/06/2026
- 2 Project title:** Exploracion, diseño y mejora de agentes inteligentes basados en RL para el entorno Lunar Lander mediante la extension de la libreria UBC Game Intelligence
Entity: University of the Basque Country (UPV/EHU)
Student: Naroa Monreal
Date of reading: 01/06/2026
- 3 Project title:** Exploración de técnicas de inteligencia artificial para asistentes de cocina
Entity: University of the Basque Country (UPV/EHU)
Student: Ana Herrero
Date of reading: 01/06/2026
- 4 Project title:** AI for game construction: tower defense case scenario
Entity: University of the Basque Country (UPV/EHU)
Student: Oier Alvarez
Obtained qualification: 8.5
Date of reading: 01/06/2025
- 5 Project title:** Development of a Reinforcement Learning-Compatible Environment for Autonomous Drone Training in LiftOff Simulator
Entity: University of the Basque Country (UPV/EHU)

Student: Juan Echeverria
Date of reading: 01/06/2025

- 6** **Project title:** 3D eta 4D ukipen-ereduen erabilera ikusmen-desgaitasuna duten ikasleen hezkuntzan
Entity: University of the Basque Country (UPV/EHU)
Student: Lorena Bocos
Obtained qualification: 10
Date of reading: 11/06/2024
- 7** **Project title:** Performance analysis of algorithms over Nvidia GPU virtualization through Docker containers and Kubernetes orchestration
Entity: University of the Basque Country (UPV/EHU)
Student: Itziar Irastortza
Date of reading: 11/06/2023
- 8** **Project title:** Dar soporte técnico en la empresa CAF para el desarrollo de herramientas que permite realizar un seguimiento de proyectos
Entity: University of Deusto (UD)
Student: Julen Martin Martinez
Obtained qualification: 7
Date of reading: 15/06/2021
- 9** **Project title:** Optimización de la planificación mediante técnicas de inteligencia artificial a nivel
Entity: University of Deusto (UD)
Student: Jon Hernandez Longo
Obtained qualification: 9
Date of reading: 15/06/2021
- 10** **Project title:** Ostalaritzako establezimenduen erreserbak kudeatzeko Androiderako aplikazioaren garapena
Entity: University of Deusto (UD)
Student: Imanol Aizpuru Arruti
Obtained qualification: 7
Date of reading: 15/06/2021
- 11** **Project title:** 3D Hezurduran Oinarritutako Biziraupen jokua Unity-n
Entity: University of Deusto (UD)
Student: Mikel Martinez Iturrioz
Obtained qualification: 9
Date of reading: 15/12/2020
- 12** **Project title:** Contraste de Modelos de Riesgo de Crédito en base a metodologías de Inteligencia Artificial
Entity: University of Deusto (UD)
Student: Maider Dorronsoro Aldaz
Obtained qualification: 10
Date of reading: 15/12/2020
- 13** **Project title:** Investigación y evaluación de la madurez de las técnicas y herramientas de inteligencia artificial aplicadas a la moda
Entity: University of Deusto (UD)
Student: Maria Zubia Irigoien
Obtained qualification: 9

Date of reading: 15/12/2020

- 14** **Project title:** Reconocimiento de imágenes mediante técnicas de inteligencia artificial: exploración de frameworks y caso de estudio en SALTO Systems
Entity: University of Deusto (UD)
Student: Maarten Handels Cuesta
Obtained qualification: 10
Date of reading: 15/12/2020
- 15** **Project title:** Bagchain: plataforma móvil de seguimiento de equipaje o bultos en transporte aéreo basada en blockchain
Entity: University of Deusto (UD)
Student: Nagore Beltran
Obtained qualification: 9
Date of reading: 15/12/2019
- 16** **Project title:** Herramienta de Web Scraping para la detección de fraude fiscal en la Hacienda Foral de Gipuzkoa
Entity: University of Deusto (UD)
Student: Maider Calzada
Obtained qualification: 10
Date of reading: 15/12/2019
- 17** **Project title:** Diseño e implementación de un CMI para Zumaia Offshore
Entity: University of Deusto (UD)
Student: Iñigo Peinado
Obtained qualification: 7
Date of reading: 18/06/2019
- 18** **Project title:** Diseño y desarrollo de una plataforma de gestión integral para clubes deportivos
Entity: University of Deusto (UD)
Student: Jokin Zulaika
Obtained qualification: 7
Date of reading: 18/06/2019
- 19** **Project title:** Galde Systems: Automatización en la gestión de incidentes software mediante técnicas OCR
Entity: University of Deusto (UD)
Student: Beñat Galdos
Obtained qualification: 10
Date of reading: 18/06/2019
- 20** **Project title:** Rediseño y optimización de una plataforma web para Indual S.A.
Entity: University of Deusto (UD)
Student: Ainhoa Gauna
Obtained qualification: 8
Date of reading: 18/06/2019
- 21** **Project title:** Golfer: Aplicación gestora de campos y hoyos para usuarios de golf
Entity: University of Deusto (UD)
Student: Garikoitz Bereziartua
Obtained qualification: 8
Date of reading: 18/06/2018

- 22** **Project title:** Arduino Hezkuntzarako: azterketa, ikastaroa eta adibide praktiko bat
Entity: University of The Basque Country (UPV/EHU)
Student: Adriana Carcedo Martín
Obtained qualification: 8
Date of reading: 20/09/2017

Courses and seminars given

- 1** **Type of event:** Curso
Name of the event: Machine Learning applications: Bagging, boosting and stacking
Organising entity: Artificial Intelligence Saturdays Donostia
Hours of teaching: 10
Teaching date: 17/10/2020
- 2** **Type of event:** Curso
Name of the event: Machine Learning applications: Computer vision
Organising entity: Artificial Intelligence Saturdays Donostia
Hours of teaching: 10
Teaching date: 17/10/2020
- 3** **Type of event:** Training Session
Name of the event: Wikidata tailerra: Wikipedia, Oteiza, Commons, Txillida, Wikidata, Basterretxea eta Wikipedia.
Organising entity: Udako Euskal Unibertsitatea (UEU) **Type of entity:** University Centres and Structures and Associated Bodies
Hours of teaching: 10
Teaching date: 03/07/2017
- 4** **Type of event:** Curso
Name of the event: Arduino platform: sensors and actuators
Organising entity: Udako Euskal Unibertsitatea (UEU) **Type of entity:** University Centres and Structures and Associated Bodies
Hours of teaching: 10
Teaching date: 29/06/2017

Materials and other teaching or educational publications.

Inigo Lopez-Gazpio; Aitor Soroa. pp. 1 - 194. Udako Euskal Unibertsitatea. ISBN 978-84-9082-670-6
Name of the materials: Git Bertsioak Kontrolatzeko Sistemarako Eskuliburua
Date of drafting: 01/05/2024
Format: Book
Corresponding author: Yes

Participation in innovative teaching projects

- 1** **Project title:** GATAI PROIEKTUA: Gai gatazkatsuak eta album ilustratuak. Memoria demokratikoen eta migrazioen irakurketa feminista. (i325-02)
Type of participation: Team member
Contribution to the project: Principal investigators: Amaia Mariezkurrena-Serrano y Ursula Luna
Number of participants: 5
Amount awarded: 6.000 €
Funding entity: Universidad del País Vasco UPV/EHU, Vicerrectorado de Grado e Innovación Educativa
Start-End date: 01/01/2025 - 31/12/2026 **Duration:** 1 year
- 2** **Project title:** Album ilustratuak gai gatazkatsuetara gerturatzeko haur eta lehen hezkuntzako irakasle eta irakaslegaiak hiritartasunerako hezkuntzan genero ikuspegian eta ikuspegi kritikoan gaitzeko diziplinarteko ekinen didaktikoak heziketa literarioaren bitartez
Type of participation: Team member
Number of participants: 5
Amount awarded: 2.000 €
Funding entity: The University of the Basque Country (UPV/EHU)
Start-End date: 2023 - 31/12/2024 **Duration:** 1 year

Plurality, interdisciplinarity and teaching complexity

In my teaching role, I have diligently educated primarily engineers on how to maximize data utility through the design and implementation of search metaheuristics, machine learning applications, and deep learning. Over several years, I have actively engaged in undergraduate and postgraduate teaching, bringing nine years of university teaching experience to the table—four years part-time (most of it due to parental leave) and five years full-time. I have delivered positively evaluated courses, contributing significantly to both theoretical and practical learning. Additionally, at the University of Deusto, I spearheaded the software development branch of the faculty, teaching advanced Java programming, SOLID principles, design patterns, testing, quality assurance, and agile development. In total, I have accumulated over 1,000 classroom teaching hours, consistently receiving high evaluations from students. Over recent years, my teaching activities have evolved within the framework of the European Credit Transfer and Accumulation System (ECTS), necessitating significant transformations in the structure and focus of the subjects taught. I have actively taught various courses at both undergraduate and postgraduate levels in Computer Engineering, Artificial Intelligence, and Big Data at the University of the Basque Country (UPV/EHU) and the University of Deusto (UD). These courses cover a broad spectrum from the theoretical and practical fundamentals of machine learning and artificial intelligence to software quality management and advanced programming.

Interdisciplinarity has been a cornerstone of my teaching approach. I have integrated knowledge from various disciplines to provide comprehensive and multifaceted training to students. For example, in the "Advanced Machine Learning" course, students not only learn advanced machine learning techniques but also apply this knowledge in practical projects involving Python programming and the use of libraries and tools. This blend of theory and practical application across different contexts has significantly enriched student learning.

Regarding coordination duties, I have collaborated closely with faculty members, as well as course and degree coordinators, to ensure alignment between competencies, activities, and assessment methods. This coordination has been vital to ensuring that the programmed activities match the ECTS credits assigned to each course, maintaining a balance between workload and learning objectives. The course design included the development of updated and relevant teaching materials, continuous syllabus

updates, and mechanisms for active student participation. These teaching guides, which detail the course objectives, competencies to be developed, activities, and evaluation methods, are publicly available on the university's website, ensuring transparency and access to necessary information for an effective teaching-learning process.

Additionally, I have coordinated the creation of innovative and adaptive educational resources to meet the evolving needs of the academic and professional environment, such as the recent publication of the textbook "Git Bertsioak Kontrolatzeko Sistemarako Eskuliburua" on Git version control. Updating materials and curricula has been an ongoing process, incorporating the latest trends and discoveries in machine learning and software quality to keep the content relevant and current. In summary, my teaching activity has been characterized by strong adaptation to ECTS standards, deep interdisciplinarity, and rigorous coordination and course design, significantly enhancing the quality of education provided and the comprehensive development of students in their respective fields of study.

Scientific or technological activities

R&D projects funded through competitive calls of public or private entities

- 1** **Name of the project:** DeepThought: Reasoning and Alignment of Large Language Models for Multilingual and Low Resource Scenarios (PID2024-159202OB-C21)
Entity where project took place: University of the Basque Country (UPV/EHU)
Name principal investigator (PI, Co-PI....): Rodrigo Agerri
Nº of researchers: 20
Start-End date: 01/09/2025 - 31/08/2028
Total amount: 271.625 €
Relevant results: Grant DeepThought (PID2024-159202OB-C21) funded by MICIU/AEI /10.13039/501100011033 and by ERDF, EU DeepThought introduces a scalable approach for adapting Large Language Models to low-resource languages through an innovative joint pretraining and alignment strategy. The project will develop empirically validated methodologies for extending open-source models like Llama-3+ and Qwen+ to languages such as Basque and Spanish, leveraging synthetic datasets and reasoning verbalizations from existing LLMs and Language Reasoning Models. Key objectives include improving zero-shot and few-shot performance through RAG techniques, enhancing test-time computation and reasoning capabilities, creating new evaluation benchmarks focusing on truthfulness and safety, developing LLM-as-a-Judge metrics, and building multimodal applications across domains like eLearning and eHealth. While initially focused on Spanish and Basque, the project aims to democratize LLM technology for Europe's low-resource languages, ensuring these communities can fully participate in AI advances.
- 2** **Name of the project:** EMIE - EFICIENCIA DE MODELOS LLM PARA INDUSTRIAS ESTRATÉGICAS
Entity where project took place: University of the Basque Country (UPV/EHU) **Type of entity:** University
Nº of researchers: 3
Start-End date: 01/04/2024 - 31/08/2026
Total amount: 120.000 €
Relevant results: Número OTRI: 2024.0747
Dedication regime: Part time
Applicant's contribution: Principal Investigator of the UPV/EHU
- 3** **Name of the project:** ILENIA: Hizkuntzen bultzada Adimen Artifizialean (2022/TL22/00215335)
Entity where project took place: University of the Basque Country (UPV/EHU)
Name principal investigator (PI, Co-PI....): Marta Villegas
Nº of researchers: 10
Start-End date: 01/01/2025 - 31/12/2025
Total amount: 7.500.000 €
Relevant results: Ayudas concedidas por el ministerio para la transformación digital y de la función pública.
- 4** **Name of the project:** CLARIAH-EUS: Europako ikerketa-azpiegiturretan Giza eta Gizarte Zientzietan euskara eta euskaraz ikertzeko aukera bultzatzeko egitasmoa
Entity where project took place: University of the Basque Country (UPV/EHU)
Nº of researchers: 10
Start-End date: 01/01/2023 - 31/12/2025
Total amount: 180.000 €

5 **Name of the project:** IC4LANG: Aprendizaje En contexto como nuevo paradigma para investigar tecnologías del lenguaje escalables y de alta precisión adaptadas a las necesidades industriales del País Vasco (Code:KK-2023-00094)

Entity where project took place: University of the Basque Country (UPV/EHU)

Nº of researchers: 15

Start-End date: 01/03/2023 - 01/03/2025

Total amount: 566.492,31 €

6 **Name of the project:** (ACROBA. European H2020-ICT-46-2020) AI-Driven Cognitive Robotic Platform for Agile Production environments.

Entity where project took place: University of Deusto (UD)

Nº of researchers: 9

Start-End date: 01/01/2021 - 30/06/2024

Relevant results: Project Id H2020-ICT-46-2020, European UNION H2020 ACROBA

Applicant's contribution: The ACROBA project is a forward-thinking initiative aimed at revolutionizing the manufacturing sector through the integration of AI-powered cognitive robotic systems. This project is designed to enhance the agility and efficiency of production environments by employing advanced artificial intelligence, particularly in the area of cognitive robotics. These innovations aim to increase adaptability and autonomous decision-making in industrial robots, thus streamlining manufacturing processes and reducing operational costs. In this context, my principal contribution to the ACROBA project involves the development of the training module for robotic arms using artificial intelligence and reinforcement learning. This module is critical as it empowers robotic arms with the ability to learn and adapt to new tasks and environments rapidly, improving their performance and flexibility. By implementing state-of-the-art AI techniques, the module enhances the robots' decision-making processes, allowing them to execute complex manufacturing tasks with higher precision and efficiency. My role focuses on optimizing the reinforcement learning algorithms that enable robots to improve their operations over time based on iterative feedback, a key factor in the project's aim to innovate manufacturing practices. This contribution not only highlights my expertise in AI and machine learning but also reinforces my dedication to advancing robotic technologies that can lead to more dynamic and responsive manufacturing environments.

7 **Name of the project:** (AI4Transport. Spain Ministry. Programa estatal de generación de conocimiento) Técnicas avanzadas de Inteligencia Artificial aplicadas a nuevas fuentes de datos y al uso de modos emergentes de movilidad para un transporte más sostenible.

Entity where project took place: University of Deusto (UD)

Nº of researchers: 8

Start-End date: 01/06/2020 - 31/05/2023

Relevant results: Ministerio de ciencia y educación

Applicant's contribution: The project aims to leverage cutting-edge AI methodologies to enhance the sustainability and efficiency of transportation systems. This initiative addresses the critical need for innovative solutions in managing increasingly complex transportation networks, optimizing routes, and reducing environmental impact. My primary contribution to this project involves providing support for the AI-based module designed to optimize routes using Vehicle Routing Problems (VRP) and Traveling Salesman Problems (TSP). This module is pivotal in the project as it utilizes sophisticated AI algorithms to analyze and optimize transportation routes, thereby minimizing travel times, reducing fuel consumption, and lowering emissions. By enhancing the efficiency of route planning, the module not only contributes to environmental sustainability but also improves operational efficiency and reduces costs for logistics companies. In this role, I focus on refining the AI algorithms and integrating real-time data analytics to adaptively manage and optimize transportation routes as conditions change. This involves working closely with data scientists and logistics experts to ensure that the AI module effectively addresses the practical challenges faced in modern transportation scenarios. My work on this project demonstrates my commitment to applying high-level AI expertise to solve real-world problems, specifically in making transportation more efficient and less environmentally impactful.

8 **Name of the project:** AI-Powered Virtual Training Environment For Collaborative Robotics

Entity where project took place: University of Deusto (UD)

Nº of researchers: 3

Start-End date: 01/09/2020 - 30/06/2021

Relevant results: Project Id: Gobierno Vasco - Departamento de Desarrollo económico e infraestructuras

- 9 Name of the project:** (LOGISTAR. European H2020 - 2018-000000085) Enhanced data management techniques for logistics planning and scheduling in real time

Entity where project took place: University of Deusto (UD)

Nº of researchers: 10

Start-End date: 01/06/2018 - 31/05/2021

Relevant results: Project Id European UNION H2020, LOGISTAR. 2018-000000085

Applicant's contribution: The LOGISTAR project represents an innovative effort in enhancing the efficiency of logistics and freight operations through advanced optimization algorithms and real-time decision-making tools. The project aims to address the complex challenges of transport and inventory management within the logistics industry by leveraging big data analytics, Internet of Things (IoT) technology, and sophisticated predictive models to facilitate more efficient and sustainable logistics operations. As a vital contributor to the LOGISTAR project, my primary role centers on developing Work Package 4 (WP4). This segment of the project focuses on creating a software module responsible for the global optimization of transport routes across various living labs. This contribution is crucial in realizing the project's objectives, as it directly influences the effectiveness of the logistical frameworks developed, ensuring that transport routes are optimized for time, cost, and environmental impact. By integrating real-time data and predictive analytics, the software module I am developing enables dynamic routing adjustments that can significantly improve logistical efficiency and reduce operational costs. This strategic involvement not only highlights my technical expertise in software development and systems optimization but also underscores my commitment to advancing technological solutions that enhance logistical operations on a global scale.

- 10 Name of the project:** Solución basada en una plataforma IoT y un dispositivo Edge Computing que ofrece servicios de seguridad mediante alertas en tiempo real, empleando análisis de imagen e inteligencia artificial

Entity where project took place: University of Deusto (UD)

Nº of researchers: 6

Start-End date: 01/04/2020 - 31/12/2020

Relevant results: In the intersection between computational linguistics (field 11) and computer science engineering (field 6, subfield 6.2), this article, published in the Procesamiento del Lenguaje Natural journal, explores innovative approaches in the field of computational linguistics as regard large language models. With an SJR rating in the Q1 category for Linguistics and Language, it highlights its scholarly significance. The paper presents methodologies that advance understanding and processing of natural languages, contributing valuable insights to the domain. Although it has garnered few citations due to its recent publication, its high SJR positioning promises a wider impact and utility in linguistic research and applications, fostering advancements in language technology. Scientific impact: The work has been published in a journal with JCR impact factor 1.2 (Revistas Españolas indexadas en el Emerging Sources Citation Index, de la Colección Principal Web of Science). The journal is also indexed as 41/1088 on Language and

linguistics Q1 96th percentile in Scopus, with an SJR impact factor of 0.68. Even its recent publication the investigation has already been cited by one work regarding to computer science, artificial intelligence field. The work is publicly available at DOI: 10.26342/2024-72-1.

Relevant results: In the intersection between computational linguistics (field 11), logic (field 1) and computer science engineering (field 6, subfield 6.2), published in the Journal of Logic and Philosophy of Logic, this article introduces PhrasIS, a fine-grained Natural Language Inference (NLI) dataset designed for the detailed evaluation of natural language understanding models. The paper outlines the creation and validation of a fine grained logic dataset, which involves kappa and ANOVA evaluations, demonstrating the rigorous and labor-intensive process required to ensure its reliability and applicability. The high number of authors on the paper reflects the significant human effort needed to undertake these notoriously challenging validations, underlining the collaborative nature of this research. This dataset is set to enhance the precision of language models by providing a robust benchmark for deeper linguistic analysis and testing. Scientific impact: The investigation is published in a journal with JCR impact factor of 0.6, ranking 10/25 in Logic (Q2). Social impact: The work has had a total of 31 interactions and is publicly available at <https://doi.org/10.1093/jigpal/jzae037>. Additional resources (both artificial intelligence models and data) are available at <https://github.com/ilopezgazpio/PhrasIS-baselines>.

- 18 Title of the work:** Uncovering Divergent Linguistic Information in Word Embeddings with Lessons for Intrinsic and Extrinsic Evaluation (Best paper award)

Name of the conference: Proceedings of the 22nd Conference on Computational Natural Language Learning.

Date of event: 2018

End date: 2018

Organising entity: Computational Natural Language Learning (CONLL)

Mikel Artetxe; Gorka Labaka; Iñigo Lopez-Gazpio; Eneko Agirre. pp. 282 - 291. 2018. ISBN 978-1-948087-72-8

Relevant results: In the intersection between computational linguistics (field 11) and computer science engineering (field 6, subfield 6.2), the investigation presents groundbreaking research in the field of natural language understanding, specifically focusing on word embedding optimization. The research introduces novel methods that allow language models to adapt their learning by tailoring word embeddings. . With 31 scopus indexed citations, the paper is widely recognized for its contributions to advancing the understanding and implementation of intrinsic knowledge, influencing both theoretical frameworks and practical applications in NLP developments. The paper was awarded as the best paper of the conference. Scientific impact: This study has achieved a high distinction with a Rank A in the SCIE Core2018, signifying its major impact and relevance within the scientific NLP community. Social impact: 31 citations on the scopus database from a wide range of domains demonstrate the interdisciplinarity of the work (94th percentile, 3.21 FWCI). Citations come from various fields, such as: computer science (6/31), social sciences (8/31), humanities (10/31), engineering (4/31) and mathematics (3/31). The work is publicly available under DOI: 10.18653/v1/k18-1028.

- 19 Title of the work:** Prácticas de laboratorio basadas en investigaciones guiadas: propuestas para el laboratorio de química analítica

Name of the conference: III Jornada sobre estrategias para la innovación de la actividad docente en Química Analítica

Date of event: 2017

End date: 2017

Organising entity: Sociedad Española de Química Analítica (SEQA).

Type of contribution: Scientific paper

Iñigo Lopez-Gazpio; Josu Lopez-Gazpio. "XXI Reunión de la Sociedad Española de Química Analítica". pp. 47 - 50. 2017. ISBN 978-84-697-5583-9

- 20 Title of the work:** Semeval-2017 task 1: Semantic textual similarity multilingual and crosslingual focused evaluation

Name of the conference: 11th International Workshop on Semantic Evaluation

Date of event: 2017

End date: 2017

Organising entity: SemEval@ NAACL-HLT. ISBN

Type of contribution: Scientific paper

Daniel Cer; Mona Diab; Eneko Agirre; Inigo Lopez-Gazpio; Lucia Specia. "Proceedings of the 11th International Workshop on Semantic Evaluation (SemEval-2017)". pp. 1 - 14. 2017. ISBN 978-1-945626-55-5

Relevant results: In the intersection between computational linguistics (field 11) and computer science engineering (field 6, subfield 6.2), the research presents a comprehensive evaluation of semantic textual similarity (STS) across multiple languages. The publication is the result of the organization of an international task, where many participants were evaluated and datasets were constructed and shared, this work introduces a benchmark challenge for assessing the effectiveness of computational models in measuring the semantic similarity of sentences. The methodologies and findings from this study have been pivotal in driving forward innovations in multilingual processing and cross-lingual transfer learning, influencing numerous subsequent studies in NLP. Scientific impact: Conference paper indexed in scopus with an FWCI factor of 27.21 (99th percentile). Social impact: The investigation has over 800 citations in Scopus, and almost 2000

in Google Scholar. This is due to the novelty of the task and materials shared. Even several years from the organization of the task, the paper is still heavily cited from multiple disciplines, such as: computer science, social sciences, mathematics and engineering. The paper is publicly available at the ACL anthology repository: ISBN: 978-1-945626-55-5. (<https://aclanthology.org/S17-2001/>). All the materials from the international task are available at: <https://competitions.codalab.org/competitions/16051> and <https://alt.qcri.org/semeval2017/>

- 21 Title of the work:** Testu-loturen labirinto semantikoan barna, esanahi-bektoreak lagun!

Organising entity: SemEval@ NAACL-HLT
Type of contribution: Scientific paper
Eneko Agirre; Aitor Gonzalez-Agirre; Inigo Lopez-Gazpio; Montse Maritxalar; German Rigau; Larraitz Uria. "Proceedings of the 10th International Workshop on Semantic Evaluation (SemEval 2016)". pp. 512 - 524. 2016. ISBN 978-1-941643-95-2
- 23 Title of the work:** iUBC at SemEval-2016 Task 2: RNNs and LSTMs for interpretable STS
Name of the conference: 10th International Workshop on Semantic Evaluation
Date of event: 2016
End date: 2016
Organising entity: SemEval@ NAACL-HLT
Type of contribution: Scientific paper
Inigo Lopez-Gazpio; Eneko Agirre; Montse Maritxalar. "Proceedings of the 10th International Workshop on Semantic Evaluation (SemEval 2016)". pp. 771 - 776. 2016. ISBN 978-1-941643-95-2
- 24 Title of the work:** Desarrollo de instrumentación electrónica basada en arduino y su uso en la experimentación en química básica
Name of the conference: XX Reunión de la Sociedad Española de Química Analítica
Date of event: 2015
End date: 2015
Organising entity: Sociedad Española de Química Analítica (SEQA)
Type of contribution: Scientific paper
Iñigo Lopez-Gazpio; Josu Lopez-Gazpio. "XX Reunión de la Sociedad Española de Química Analítica". pp. 177 - 177. 2015. ISBN 978-84-8408-867-7
- 25 Title of the work:** Euskararen Sorkuntza Automatikoa: lehen urratsak
Name of the conference: I Ikergazte Nazioarteko Ikerketa Euskaraz
Date of event: 2015
End date: 2015
Organising entity: Udako Euskal Unibertsitatea (UEU)
Type of contribution: Scientific paper
Manex Agirrezabal; Itziar Gonzalez-Dios; Iñigo Lopez-Gazpio. "I Ikergazte Nazioarteko Ikerketa Euskaraz". pp. 15 - 23. 2015. ISBN 978-84-8438-540-0

- 26** **Title of the work:** SemEval-2015 Task 2: Semantic Textual Similarity, English, Spanish and Pilot on Interpretability.
Name of the conference: 9th International Workshop on Semantic Evaluation
Date of event: 2015
End date: 2015
Organising entity: SemEval@ NAACL-HLT
Type of contribution: Scientific paper
Eneko Agirre; Carmen Banea; Claire Cardie; Daniel M Cer; Mona T Diab; Aitor Gonzalez-Agirre; Weiwei Guo; Inigo Lopez-Gazpio; Montse Maritxalar; Rada Mihalcea. "Proceedings of the 9th International Workshop on Semantic Evaluation.". pp. 252 - 263. 2015. ISBN 978-1-941643-40-2
- 27** **Title of the work:** UBC: Cubes for English Semantic Textual Similarity and Supervised Approaches for Interpretable STS.
Name of the conference: 9th International Workshop on Semantic Evaluation
Date of event: 2015
End date: 2015
Organising entity: SemEval@ NAACL-HLT
Type of contribution: Scientific paper
Eneko Agirre; Aitor Gonzalez-Agirre; Inigo Lopez-Gazpio; Montse Maritxalar; German Rigau; Larraitz Uria. "Proceedings of the 9th International Workshop on Semantic Evaluation.". pp. 178 - 183. 2015. ISBN 978-1-941643-40-2
- 28** **Title of the work:** Web Application for Reading Practice
Name of the conference: 6th IADAT international conference on Education
Date of event: 2013
End date: 2013
Organising entity: IADAT-e2013.
Type of contribution: Scientific paper
Iñigo Lopez-Gazpio; Montserrat Marichalar Anglada. "IADAT-e2013: Proceedings of the 6th IADAT International Conference on Education". pp. 74 - 78. 2013. ISBN 978-84-935915-3-3

Science Outreach activities

- 1** **Title of the work:** Radio Interview with "28 kanala" news for the dissemination of the "Git Bertsioak Kontrolatzeko Sistemarako Eskuliburua" book
Date of event: 05/07/2024
City organizing entity: Udako Euskal Unibertsitatea,
- 2** **Title of the work:** Interview with Tolosaldeako Ataria press news for the dissemination of the "Git Bertsioak Kontrolatzeko Sistemarako Eskuliburua" book
Date of event: 27/06/2024
City organizing entity: Udako Euskal Unibertsitatea,
- 3** **Title of the work:** Interview with Udako Euskal Unibertsitatea education agency for the dissemination of the "Git Bertsioak Kontrolatzeko Sistemarako Eskuliburua" book
Date of event: 18/06/2024
City organizing entity: Udako Euskal Unibertsitatea,

- 4 Title of the work:** Invitado para la difusión de una publicación por radio (Lopez-Gazpio, I. (2015) Hizkuntza-oinarriak.)
Date of event: 12/03/2015
Organising entity: Programa Lau Haizetara dentro del canal de radio Bizkaia irratia

R&D management and participation in scientific committees

Scientific, technical and/or assessment committees

Committee title: Steering committee for SemEval 2019 responsible for evaluating the quality of tasks
Affiliation entity: Semeval **Type of entity:** Foundation
Start-End date: 2018 - 2018

Organization of R&D activities

- 1 Title of the activity:** Co-organizer of the Semantic Textual Similarity task in the Semeval Workshop (2017)
<http://alt.qcri.org/semeval2017/task1/>
Start date: 2017
- 2 Title of the activity:** Co-organizer of the Semantic Textual Similarity task in the Semeval Workshop (2016)
<http://alt.qcri.org/semeval2016/task2/>
Start date: 2016
- 3 Title of the activity:** Co-organizer of the interpretable Semantic Textual Similarity task in the Semeval Workshop (2016) <http://alt.qcri.org/semeval2016/task1/>
Start date: 2016
- 4 Title of the activity:** Co-organizer of the Semantic Textual Similarity task in the Semeval Workshop (2015)
<http://alt.qcri.org/semeval2015/task2/>
Start date: 2015

National and international forums and committees

- 1 Name of the forum:** Google summit for young NLP researchers
Professional category: Invitado para participación
Organising entity: Google Zurich **Type of entity:** R&D Centre
City organizing entity: Zurich, Switzerland
Start-End date: 25/09/2017 - 27/09/2017
- 2 Name of the forum:** Co-organizer of HAIS conference
Professional category: Organizing staff
Organising entity: University of Deusto (UD)
Start date: 2021
- 3 Name of the forum:** Co-organizer of ICEUTE conference
Professional category: Organizing staff
Organising entity: University of Deusto (UD)
Start date: 2021

- 4** **Name of the forum:** Co-organizer of SOCO conference
Professional category: Organizing staff
Organising entity: University of Deusto (UD)
Start date: 2021
- 5** **Name of the forum:** Multilingual Multimodal Language Processing Using Neural Networks
Professional category: Asistente
Organising entity: North American Association for Computational Linguistics (NAACL)
City organizing entity: San Diego. California, United States of America
Start date: 2016
- 6** **Name of the forum:** Recent Progress in Deep Learning for Natural Language Processing
Professional category: Asistente
Organising entity: North American Association for Computational Linguistics (NAACL)
City organizing entity: San Diego. California, United States of America
Start date: 2016
- 7** **Name of the forum:** IEB2013: Telefonoak eta Informatika
Professional category: Asistente
Organising entity: Udako Euskal Unibertsitatea (UEU)
City organizing entity: San Sebastian, Spain
Start date: 2013
Type of entity: University Centres and Structures and Associated Bodies

Other achievements

Stays in public or private R&D centres

- 1** **Entity:** University of Edinburgh
Faculty, institute or centre: Informatics Forum
City of entity: Edinburgh, United Kingdom
Start-End date: 15/09/2017 - 15/12/2017
Duration: 92 days
Name of programme: EST16/00192
Goals of the stay: Doctorate
Narrative explanation: A highlight of my tenure has been the two research stays at the Informatics Forum of the University of Edinburgh. These visits were instrumental in conducting research that culminated in the production of an outstanding paper, "Word N-gram attention models for sentence similarity and inference," which has significantly contributed to advancements in natural language processing. This investigation not only enhanced my research portfolio but also provided valuable insights for my doctorate.
- 2** **Entity:** University of Edinburgh
Faculty, institute or centre: Informatics Forum
City of entity: Edinburgh, United Kingdom
Start-End date: 15/09/2016 - 15/12/2016
Duration: 92 days
Name of programme: EST15/00250
Goals of the stay: Doctorate

Obtained grants and scholarships

- 1** **Name of the grant:** Beneficiary of competitive concurrent support for the training of university teaching staff in the training and mobility sub-programmes within the State Talent Promotion and Employability Programme, as part of the State Scientific and Technical Research and Innovation Plan 2013-2016 in R+D+i for doctoral studies (FPU13/00501)
Awarding entity: Ministry of Education, Social Policy and Sport
Conferral date: 2013
End date: 2018
- 2** **Name of the grant:** Beneficiary of competitive support for a temporary stay of 92 days at the University of Edinburgh under the supervision of Mirella Lapata under the FPU sub-programme (Call 2016, EST16/00192)
Awarding entity: Ministerio de Educación, Política Social y Deporte **Type of entity:** State agency
Conferral date: 13/09/2016 **Duration:** 92 days
End date: 16/12/2016
- 3** **Name of the grant:** Beneficiary of competitive support for a temporary stay of 92 days at the University of Edinburgh under the supervision of Mirella Lapata under the FPU sub-programme (Call 2015, EST15/00250)
Awarding entity: Ministry of Education, Social Policy and Sport
Conferral date: 14/09/2015 **Duration:** 92 days
End date: 18/12/2015
- 4** **Name of the grant:** Provision of € 3000 to facilitate the realization of university master's degrees in the University of the Basque Country (UPV/EHU)
Awarding entity: Universidad del País Vasco **Type of entity:** University
Conferral date: 2013
End date: 2014
- 5** **Name of the grant:** Winner of the XXXVII Final Career Awards 2013 convened by financial institution Kutxa
Awarding entity: Kutxa
Conferral date: 2013
End date: 2013
- 6** **Name of the grant:** Beneficiary of the "GPU Academic Grant Program" from the NVIDIA Corporation from which we obtain Hardware Material to Accelerate Neural Network Computation by High-Performance Graphics Cards
Awarding entity: NVIDIA
Conferral date: 2017
- 7** **Name of the grant:** Beneficiary of the "GPU Academic Grant Program" from the NVIDIA Corporation from which we obtain Hardware Material to Accelerate Neural Network Computation by High-Performance Graphics Cards
Awarding entity: NVIDIA
Conferral date: 2016

Periods of research activity and knowledge transfer

Name of the action: CNEAI Six-year research evaluation

Certifying entity: Agencia Nacional de Evaluación de la Calidad y Acreditación

Type of entity: ANECA is the public body responsible for carrying out evaluation

Date of recognition: 01/09/2025

Six-year period of active research: Yes

Score observed: Favorable

Starting year: 2015

Completion date: 2020

Evaluation period: 2015, 2016, 2017, 2018, 2019, 2020

Call year: 2024
